

Tennessee Child Count Data (618)

Dec. 1, 2006

Table 1-Section A reflects the number of infants and toddlers, ages birth through age 2 (children who have not reached their third birthday) who are receiving early intervention services under Individual with Disabilities Education Act (IDEA), have an Individualized Family Service Plan (IFSP) in place on December 1. Data are collected for each individual age and for each racial/ethnic category. A cross-tabulation of individual age by race/ethnicity is not collected.

Data has been collected since 1987-88. From 1987-88 through 1997-98 States also reported on the number of infants and toddlers evaluated and determined to be in need of early intervention services, but who were not receiving services on December 1. This requirement was eliminated for the 1998-1999 collection. The 1997 reauthorization of IDEA requires all States to collect race/ethnicity data. States reported on this new data element for the 1998-99 data collection year.¹

¹ IDEA Part C Data Fact Sheet, Child Count, OSEP Data History: September 2003

Definitions of Race/Ethnicity Categories:

- American Indian or Alaskan Native: A person having origins in any of the original peoples of North and South America (including Central America) and who maintains tribal affiliation or community attachment.
- Asian or Pacific Islander: A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. The Pacific Islands include Hawaii, Guam, and Samoa.
- Black or African American (not Hispanic): A person having origins in any the black racial groups of Africa.
- Hispanic or Latino: A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.
- White (not Hispanic): A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.
- Total: The unduplicated total across the race/ethnicity designations.

Analysis of data by race/ethnicity can only be conducted on data submitted after the 1997-98 reporting period. According to federal guidelines (1) children can only be reported in one category; and (2) follow the race/ethnicity of the child's biological mother if there is a question.²

² Tennessee's Early Intervention System, Data Collection Forms, Specific Instructions.

Infants and Toddlers Receiving Early Intervention Services by Age Group

	12/1/94	12/1/95	12/1/96	12/1/97	12/1/98	12/1/99	12/1/00	12/1/01	12/1/02	12/1/03	12/1/04	12/1/05	12/1/06

Table 1-Section B: This Section of Table 1 is a new OSEP reporting requirement beginning with December 1, 2006 Child Count addressing 'Gender'. Data reflects the number of infants and toddlers, by gender, ages birth through age 2 (children who have not reached their third birthday) who are receiving early intervention services under Individual with Disabilities Education Act (IDEA), and have an Individualized Family Service Plan (IFSP) in place on December 1.

Infants & Toddlers Receiving Early Intervention Services by Gender	
	2006
Male	2455
Female	1559
Total	4014

Table 2-Report of Program Settings where early intervention services are provided to infants, toddlers with disabilities and their families in accordance with Part C. The original program settings categories included home, family day care, regular nursery school/day care center, outpatient service facility, early intervention classroom/center, hospital (inpatient), residential facility, and other setting. In 1998-99, Office of Special Education Programs (OSEP) eliminated the family child care category from the data collection. In addition, OSEP changed the labels, but not the definitions, of three categories. The early intervention classroom/center setting was re-named program designed for children with developmental delay or disabilities. The regular nursery school/child care center setting became program designed for typically developing children. Outpatient service facility was changed to service provider location. The program settings data collection requirements have not changed since 1998-99 revisions. Data are collected for seven program settings; the categories and their definitions are presented in Table 2.1 below. Each infant or toddler who receives early intervention services is reported only once on the Child Count form. Although infants and toddlers often receive services in several program settings, this data collection only collects information on the primary setting, that is, the program setting in which the infant or toddler receives the most hours of early intervention service.³

2005-2006 Report Change

Beginning with the December 1, 2006 Child Count, OSEP reporting requirements changed related to 'Program Settings' data. The seven program settings previously reported have now been collapsed into three settings. The definitions for these three settings are presented in Table 2.1 below.

Table 2.1

Program Setting	Definition
1. Home	Services are provided primarily in the principal residence of the child's family or caregivers.
2. Community-based	Services are provided primarily in a setting where children without disabilities typically are found. These settings include but are not limited to child care centers (including family day care), preschools, regular nursery schools, early childhood center, libraries, grocery stores, parks, restaurants, and community centers (e.g., YMCA, Boys and Girls Clubs).
3. Other Setting	Services are provided primarily in a setting that is not home or community-based. These settings include, but are not limited to, services provided in a hospital, residential facility, clinic, and EI center/class for children with disabilities.

Table 3-Report on Infants and Toddlers Exiting Part C Programs. State counts the number of infants and toddlers with disabilities, ages birth through age 2, who exited Part C services during a 12 month reporting period. Only infants and toddlers who had an active individualized family service plan (IFSP) in place at some time during the State determined 12 month reporting period. Data has been collected since 1998-99 reporting period. No changes have been made to this data collection. ⁴

Table 3.1

Program Completion	Definition
1. Completion of IFSP <i>prior to reaching maximum age</i> for Part C.	Include all children who have <i>not reached maximum age</i> for Part C, have completed their IFSP, and no longer require services under IDEA, Part C.
2. Eligible for IDEA, Part B.	Include all children served in Part C who exited Part C and were determined to be eligible for Part B during the reporting period. This includes children who receive Part B services in conjunction with Head Start.
3. Not eligible for Part B, exit with referrals to other programs.	Include all children <i>who reached maximum age</i> for Part C, were determined not eligible for Part B, and were referred to other programs, which may include preschool learning centers, Head Start (but not receiving Part B services), and child care centers, and/or were referred for other services, which may include health and nutrition services, such as WIC.
4. Not eligible for Part B, exit with no referrals.	Include all children who reached maximum age for Part C and were determined not eligible for Part B, but were not referred to other programs.
5. Part B eligibility not determined.	Include all children for whom Part B eligibility has not been made. This category includes children who were referred for Part B evaluation, but for whom the eligibility determination has not yet been made or reported and children for whom parents did not consent to transition planning. Include in this category any child <i>who reached maximum age</i> for Part C, and who has not been counted in categories 2 through 4 above.
Other Exit Reasons	Definition
6. Deceased	Include all children who died during the reporting period, even if their death occurred at the age of exit.
7. Moved out of State.	Include all children who moved out of State during the reporting period. Do not report a child who moved within State (i.e., from one program to another) if services are known to be continuing.
8. Withdrawal by parent (or guardian)	Include all children whose parents declined all services after an IFSP was in place, as well as children whose parents declined to consent to IFSP services and provided written or verbal indication of withdrawal from services.
9. Attempts to contact the parent and/or child were unsuccessful.	Include all children who have not reached the maximum age of service under Part C, who had an active IFSP, and for whom Part C personnel have been unable to contact or locate the family or child after repeated, documented attempts. Include in this category any child who did not complete an IFSP and exited Part C before reaching maximum age and who has not been counted in categories 6 through 8.

Table 4-Report of Early Intervention Services on IFSP. States counts the number of early intervention services provided to infants and toddlers with disabilities according to the individualized family service plan (IFSP) in place on December 1 of the reporting year. Data are collected as a two-way tabulation of service category by race/ethnicity. These data are not collected by individual age year. Infants and toddlers may be reported as receiving one or more services. Data was first collected in 1988-89 on a voluntary basis. Beginning with the 1989-90 data collection, States were required to report services data. Five service categories were added to the data collection in 1989-90 (nursing services, respite care, social work services, and transportation), and two more were added for the 1992-93 collection (assistive technology services/devices and vision services). The 1997 reauthorization of IDEA added the requirement that States collect race/ethnicity data. The 1998-99 data collection year was the first time service data were reported according to the child's race/ethnicity. This data collection captures only the services on the IFSP, not the number of times a particular service was received. Children and their families are counted under each type of service they are receiving.⁵

Early Intervention Services:

Assistive Technology Services
 Audiology
 Family Training, Counseling, and Home Visits
 Medical Services
 Health Services
 Nursing Services
 Nutrition Services
 Occupational Therapy
 Physical Therapy

Psychological Services
 Social Work Services
 Special Instruction
 Speech Language Pathology
 Transportation and related costs
 Vision Services
 Other Early Intervention Services

(for definitions of services see IDEA "97 Final Regulations CFR 303.12)
